# SUBJECT INDEX

## Abundances of the elements

The abundances and mass distribution of planetary nebulae in the galactic bulge (Webster, B.L.), 230, 377  
C/He abundances in WC stars (Smith, L.F., Hummer, D.G.), 230, 511

Isotopic magnesium abundances in stars (McWilliam, A., Lambert, D.L.), 230, 573

Elemental abundance analyses with coadded Dominion Astrophysical Observatory spectrograms -III. The superficially normal standard stars Theta Leonis, Tau Herculis and Omicron Pegasi (Adelman, S.J.), 230, 671

## Accretion and accretion discs

Raman scattering of the synchrotron self-absorbed radiation in accretion discs (Krishan, V.), 230, 183  
An accretion disc in the broad-line radio galaxy 3C390.3? (Pérez, E., Penston, M.V., Tadhunter, C., Mediavilla, E., Moles, M.), 230, 353

## Celestial mechanics

Two homological models for the evolution of star clusters (Heggie, D.C., Stevenson, D.), 230, 223  
The diffusion of stars through phase space (Binney, J., Lacey, C.), 230, 597

## Cosmology

Fluctuations in the X-ray background and the large-scale structure of the Universe (Barcons, X., Fabian, A.C.), 230, 189

Erratum: Voids and velocities in initially Gaussian models for large-scale structure (Melott, A.L.), 230, 479

Evolution of Ly $\alpha$  clouds: observational biases due to line crowding (Liu, X.D., Jones, B.J.T.), 230, 481

Effects of blending on estimates of the redshift evolution of QSO Ly $\alpha$  absorbers (Parnell, H.C., Carswell, R.F.), 230, 491

High-redshift quasars in the Cold Dark Matter cosmogony (Efsthathiou, G., Rees, M.J.), 230, 5P

Photino decay and the ionization of Lyman  $\alpha$  clouds at large redshifts (Sciama, D.W.), 230, 13P

## Data reduction

The statistical determination of substructure in clusters of galaxies (Fitchett, M.), 230, 161

## Galactic structure and stellar dynamics

Kinematics and properties of F stars near the North Galactic Pole - II. The isothermal disc (Adamson, A.J., Hill, G., Fisher, W., Hilditch, R.W., Sinclair, C.D.), 230, 273

The abundances and mass distribution of planetary nebulae in the galactic bulge (Webster, B.L.), 230, 377

The diffusion of stars through phase space (Binney, J., Lacey, C.), 230, 597

## Galaxies

A redshift map of the Triangulum Australe-Ara region: further indication that Centaurus and Pavo are one and the same supercluster (Fairall, A.P.), 230, 69

Digital plate coaddition: results on a field centred on IC 4296 (Marston, A.P.), 230, 97

Spectral energy distributions of galaxies in high-redshift clusters-III. Abell 370 at  $z=0.37$  (MacLaren, I., Ellis, R.S., Couch, W.J.), 230, 249

## Galaxies - active

A deep radio and optical survey near the North Galactic Pole - IV. VLA observations and optical identifications of 5C 12 sources (Benn, C.R., Grueff, G., Vigotti, M., Wall, J.V.), 230, 1

Far-ultraviolet absorption lines in active galaxies (Ulrich, M.-H.), 230, 121

The cluster environments of powerful radio galaxies (Prestage, R.M., Peacock, J.A.), 230, 131

Serendipitous discovery of an AGN showing rapid X-ray variability (Barstow, M.A., Stanger, V.J.), 230, 207

The double radio nucleus of Arp 220 (Norris, R.P.), 230, 345

An accretion disc in the broad-line radio galaxy 3C390.3? (Pérez, E., Penston, M.V., Tadhunter, C., Mediavilla, E., Moles, M.), 230, 353

Jets with entrained clouds - II. The synchrotron spectrum and emission structure (Coleman, C.S., Bicknell, G.V.), 230, 497

Spectrophotometry of active galaxies - I. The observations (Morris, S.L., Ward, M.J.), 230, 639

## Galaxies - formation of

Erratum: Voids and velocities in initially Gaussian models for large-scale structure (Melott, A.L.), 230, 479

High-redshift quasars in the Cold Dark Matter cosmogony (Efsthathiou, G., Rees, M.J.), 230, 5P

## Subject index

### Galaxies – nuclei of

- The double radio nucleus of Arp 220 (Norris, R.P.), 230, 345  
An accretion disc in the broad-line radio galaxy 3C390 (Pérez, E., Penston, M.V., Tadhunter, C., Mediavilla, E., Moles, M.), 230, 353

### Galaxies – Seyfert

- A mid- to far-infrared variability study of the intermediate Seyfert galaxy, Mk 6 (Clement, R., Sembay, S., Hanson, C.G., Coe, M.J.), 230, 117  
Serendipitous discovery of an AGN showing rapid X-ray variability (Barstow, M.A., Stanger, V.J.), 230, 207  
The double radio nucleus of Arp 220 (Norris, R.P.), 230, 345

### Galaxy clustering

- Evolution of Ly $\alpha$  clouds: observational biases due to line crowding (Liu, X.D., Jones, B.J.T.), 230, 481  
Effects of blending on estimates of the redshift evolution of QSO Ly $\alpha$  absorbers (Parnell, H.C., Carswell, R.F.), 230, 491

### Galaxy clusters

- A redshift map of the Triangulum Australe–Ara region: further indication that Centaurus and Pavo are one and the same supercluster (Fairall, A.P.), 230, 69  
The cluster environments of powerful radio galaxies (Prestage, R.M., Peacock, J.A.), 230, 131  
The statistical determination of substructure in clusters of galaxies (Fitchett, M.), 230, 161  
Spectral energy distributions of galaxies in high-redshift clusters – III. Abell 370 at  $z=0.37$  (Maclaren, I., Ellis, R.S., Couch, W.J.), 230, 249  
Erratum: Voids and velocities in initially Gaussian models for large-scale structure (Melott, A.L.), 230, 479

### Gravitation and gravitational radiation

- Remarkable properties of the limiting counter-rotating disc (Lemos, J.P.S.), 230, 451

### Infrared astronomy

- A mid- to far-infrared variability study of the intermediate Seyfert galaxy, Mk 6 (Clement, R., Sembay, S., Hanson, C.G., Coe, M.J.), 230, 117

- Infrared polarimetry of dark clouds – II. Magnetic field structure in the  $\rho$  Ophiuchi dark cloud (Sato, S., Tamura, M., Nagata, T., Kaifu, N., Hough, J., McLean, I.S., Garden, R.P., Gatley, I.), 230, 321  
On the nature and environment of Omicron Scorpii (Whittet, D.C.B.), 230, 473

- Infrared spectropolarimetry of AFGL 2591: evidence for an annealed grain component (Aitken, D.K., Roche, P.F., Smith, C.H., James, S.D., Hough, J.H.), 230, 629

- Luminescence from interstellar carbons: evidence for diamond-like dust from extended red and near-infrared emission (Duley, W.W., Williams, D.A.), 230, 1P

### Instruments and techniques

- Digital plate coaddition: results on a field centred on IC 4296 Marston, A.P.), 230, 97  
Atmospheric dispersion at prime focus (Wynne, C.G., Worswick, S.P.), 230, 457

### Intergalactic medium

- Fluctuations in the X-ray background and the large-scale structure of the Universe (Barcons, X., Fabian, A.C.), 230, 189  
Evolution of Ly $\alpha$  clouds: observational biases due to line crowding (Liu, X.D., Jones, B.J.T.), 230, 481  
Effects of blending on estimates of the redshift evolution of QSO Ly $\alpha$  absorbers (Parnell, H.C., Carswell, R.F.), 230, 491  
Photino decay and the ionization of Lyman  $\alpha$  clouds at large redshifts (Sciama, D.W.), 230, 13P

### Interstellar grains

- Spectropolarimetry of the 3- $\mu$ m ice band in Elias 16 (Taurus Dark Cloud) (Hough, J.H., Sato, S., Tamura, M., Yamashita, T., McFadzean, A.D., Rouse, M.F., Whittet, D.C.B., Kaifu, N., Suzuki, H., Nagata, T., Gatley, I., Bailey, J.), 230, 107  
A mid- to far-infrared variability study of the intermediate Seyfert galaxy, Mk 6 (Clement, R., Sembay, S., Hanson, C.G., Coe, M.J.), 230, 117  
Formation of planets around stars of various masses – II. Stars of two and three solar masses and the origin and evolution of circumstellar dust clouds (Nakano, T.), 230, 551  
Infrared polarimetry of dark clouds – II. Magnetic field structure in the  $\rho$  Ophiuchi dark cloud (Sato, S., Tamura, M., Nagata, T., Kaifu, N., Hough, J., McLean, I.S., Garden, R.P., Gatley, I.), 230, 321  
On the nature and environment of Omicron Scorpii (Whittet, D.C.B.), 230, 473

Infrared spectropolarimetry of AFGL 2591: evidence for an annealed grain component (Aitken, D.K., Roche, P.F., Smith, C.H., James, S.D., Hough, J.H.), 230, 629

Luminescence from interstellar carbons: evidence for diamond-like dust from extended red and near-infrared emission (Duley, W.W., Williams, D.A.), 230, 1P

## Interstellar medium

The sealing of fragmenting shells - evidence from optical studies of the Vela remnant (Meabum, J., Hartquist, T.W., Dyson, J.E.), 230, 243

## Magellanic Clouds

Binary star clusters in the Large Magellanic Cloud (Bhatia, R.K., Hatzidimitriou, D.), 230, 215

Effective temperatures and radii of Small Magellanic Cloud supergiants (Thompson, G.I., Nandy, K., Morgan, D.H., Houziaux, L.), 230, 429

## Masers

The circumstellar envelope of an unusual OH/IR star, OH 19.2-1.0 (Chapman, J.M.), 230, 415

## Molecules and molecular clouds

Chemical modelling of molecular sources - VI Carbon-bearing molecules in oxygen-rich circumstellar envelopes (Nejad, L.A.M., Millar, T.J.), 230, 79

Infrared polarimetry of dark clouds - II. Magnetic field structure in the Ophiuchi dark cloud (Sato, S., Tamura, M., Nagata, T., Kaifu, N., Hough, J., McLean, I.S., Garden, R.P., Gatley, I.), 230, 321

Non-equilibrium level populations of molecular hydrogen - I. Uniform density, static clouds (Wagenblast, R., Hartquist, T.W.), 230, 363

Infrared spectropolarimetry of AFGL 2591: evidence for an annealed grain component (Aitken, D.K., Roche, P.F., Smith, C.H., James, S.D., Hough, J.H.), 230, 629

Chemistry in T Tauri winds (Rawlings, J.M.C., Williams, D.A., Cantó, J.), 230, 695

## Nebulae - gaseous

Formation of planets around stars of various masses - II. Stars of two and three solar masses and the origin and evolution of circumstellar dust clouds (Nakano, T.), 230, 551

## Nebulae - planetary

The abundances and mass distribution of planetary nebulae in the galactic bulge (Webster, B.L.), 230, 377

## Novae

White dwarf heating and the ultraviolet flux in dwarf novae (Pringle, J.E.), 230, 587

## Physical processes

Raman scattering of the synchrotron self-absorbed radiation in accretion discs (Krishan, V.), 230, 183

Non-equilibrium level populations of molecular hydrogen - I. Uniform density static clouds (Wagenblast, R., Hartquist, T.W.), 230, 363

Jets with entrained clouds - II. The synchrotron spectrum and emission structure (Coleman, C.S., Bicknell, G.V.), 230, 497

Photino decay and the ionization of Lyman  $\alpha$  clouds at large redshifts (Sciama, D.W.), 230, 13P

## Planets

Formation of planets around stars of various masses - II. Stars of two and three solar masses and the origin and evolution of circumstellar dust clouds (Nakano, T.), 230, 551

## Polarization of starlight

Spectropolarimetry of the 3- $\mu$ m ice band in Elias 16 (Taurus Dark Cloud) (Hough, J.H., Sato, S., Tamura, M., Yamashita, T., McFadzean, A.D., Rouse, M.F., Whittet, D.C.B., Kaifu, N., Suzuki, H., Nagata, T., Gatley, I., Bailey, J.), 230, 107

Infrared polarimetry of dark clouds - II. Magnetic field structure in the  $\epsilon$  Ophiuchi dark cloud (Sato, S., Tamura, M., Nagata, T., Kaifu, N., Hough, J., McLean, I.S., Garden, R.P., Gatley, I.), 230, 321

Infrared spectropolarimetry of AFGL 2591: evidence for an annealed grain component (Aitken, D.K., Roche, P.F., Smith, C.H., James, S.D., Hough, J.H.), 230, 629

## Pulsars

A relation between subpulse widths and the polarization properties of pulsars (Ashworth, M.), 230, 87

## Quasars

A deep radio and optical survey near the North Galactic Pole - IV. VLA observations and optical identifications of 5C 12 sources (Benn, C.R., Gruelf, G., Vigotti, M., Wall, J.V.), 230, 1

## Subject index

- Raman scattering of the synchrotron self-absorbed radiation in accretion discs (Krishan, V.), 230, 183  
Fluctuations in the X-ray background and the large-scale structure of the Universe (Barcons, X., Fabian, A.C.), 230, 189  
Evolution of Ly $\alpha$  clouds: observational biases due to line crowding (Liu, X.D., Jones, B.J.T.), 230, 481  
Effects of blending on estimates of the redshift evolution of QSO Ly $\alpha$  absorbers (Pamell, H.C., Carswell, R.F.), 230, 491  
High-redshift quasars in the Cold Dark Matter cosmogony (Efsthathiou, G., Rees, M.J.), 230, 5P

## Radio astronomy

- A deep radio and optical survey near the North Galactic Pole – IV. VLA observations and optical identifications of 5C 12 sources (Benn, C.R., Grueff, G., Vigotti, M., Wall, J.V.), 230, 1  
A relation between subpulse widths and the polarization properties of pulsars (Ashworth, M.), 230, 87  
The cluster environments of powerful radio galaxies (Prestage, R.M., Peacock, J.A.), 230, 131  
Raman scattering of the synchrotron self-absorbed radiation in accretion discs (Krishan, V.), 230, 183  
The double radio nucleus of Arp 220 (Norris, R.P.), 230, 345  
An accretion disc in the broad-line radio galaxy 3C390.3? (Pérez, E., Penston, M.V., Tadhunter, C., Mediavilla, E., Moles, M.), 230, 353  
The circumstellar envelope of an unusual OH/IR star, OH 19.2-1.0 (Chapman, J.M.), 230, 415  
Jets with entrained clouds – II. The synchrotron spectrum and emission structure (Coleman, C.S., Bicknell, G.V.), 230, 497

## Relativity

- Remarkable properties of the limiting counter-rotating disc (Lemos, J.P.S.), 230, 451

## Spectroscopy

- Non-LTE calculations of O II line strengths in early-type stars (Brown, P.J.F., Dufton, P.L., Lennon, D.J.), 230, 443

## Stars – atmospheres of

- On the connection between model stars and real stars (Underhill, A.B.), 230, 55  
Non-LTE calculations of O II line strengths in early-type stars (Brown, P.J.F., Dufton, P.L., Lennon, D.J.), 230, 443  
C/He abundances in WC stars (Smith, L.F., Hummer, D.G.), 230, 511

## Stars – chemical composition of

- C/He abundances in WC stars (Smith, L.F., Hummer, D.G.), 230, 511  
Isotopic magnesium abundances in stars (McWilliam, A., Lambert, D.L.), 230, 573  
Elemental abundance analyses with coadded Dominion Astrophysical Observatory spectrograms – III. The superficially normal standard stars Theta Leonis, Tau Herculis and Omicron Pegasi (Adelman, S.J.), 230, 671

## Stars – clusters of

- Binary star clusters in the Large Magellanic Cloud (Bhatia, R.K., Hatzidimitriou, D.), 230, 215  
Two homological models for the evolution of star clusters (Heggie, D.C., Stevenson, D.), 230, 223  
On the nature and environment of Omicron Scorpii (Whittet, D.C.B.), 230, 473

## Stars – mass loss from

- Chemical modelling of molecular sources – VI. Carbon-bearing molecules in oxygen-rich circumstellar envelopes (Nejad, L.A.M., Millar, T.J.), 230, 79  
The sealing of fragmenting shells – evidence from optical studies of the Vela remnant (Meabum, J., Hantquist, T.W., Dyson, J.E.), 230, 243  
The circumstellar envelope of an unusual OH/IR star, OH 19.2-1.0 (Chapman, J.M.), 230, 415  
Chemistry in T Tauri winds (Rawlings, J.M.C., Williams, D.A., Cantó, J.), 230, 695

## Stars – photometry of

- Effective temperatures and radii of Small Magellanic Cloud supergiants (Thompson, G.I., Nandy, K., Morgan, D.H., Houziaux, L.), 230, 429  
On the nature and environment of Omicron Scorpii (Whittet, D.C.B.), 230, 473

## Stars – spectroscopy of

- On the connection between model stars and real stars (Underhill, A.B.), 230, 55  
C/He abundances in WC stars (Smith, L.F., Hummer, D.G.), 230, 511  
Isotopic magnesium abundances in stars (McWilliam, A., Lambert, D.L.), 230, 573  
Elemental abundance analyses with coadded Dominion Astrophysical Observatory spectrograms – III. The superficially normal standard stars Theta Leonis, Tau Herculis and Omicron Pegasi (Adelman, S.J.), 230, 671

## Stars – structure and evolution of

On the connection between model stars and real stars (Underhill, A.B.), 230, 55

## Stars – variable

Observations of 1.4-Hz quasi-periodic oscillations in Cir X-1 (Tennant, A.F.), 230, 403

Three-halves law in sunspot cycle shape (Bracewell, R.N.), 230, 535

White dwarf heating and the ultraviolet flux in dwarf novae (Pringle, J.E.), 230, 587

## Stars – velocities of

Kinematics and properties of F stars near the North Galactic Pole – II. The isothermal disc (Adamson, A.J., Hill, G., Fisher, W., Hilditch, R.W., Sinclair, C.D.), 230, 273

## Sun

Three-halves law in sunspot cycle shape (Bracewell, R.N.), 230, 535

## Supernovae and supernova remnants

The sealing of fragmenting shells – evidence from optical studies of the Vela remnant (Meabum, J., Hartquist, T.W., Dyson, J.E.), 230, 243

Distances to the remnants of historical Type I supernovae (Strom, R.G.), 230, 331

Jets with entrained clouds – II. The synchrotron spectrum and emission structure (Coleman, C.S., Bicknell, G.V.), 230, 497

## Ultraviolet astronomy

Far-ultraviolet absorption lines in active galaxies (Ulrich, M.-H.), 230, 121

White dwarf heating and the ultraviolet flux in dwarf novae (Pringle, J.E.), 230, 587

## X-ray astronomy

Fluctuations in the X-ray background and the large-scale structure of the Universe (Barcons, X., Fabian, A.C.), 230, 189

Serendipitous discovery of an AGN showing rapid X-ray variability (Barstow, M.A., Stanger, V.J.), 230, 207

Observations of 1.4-Hz quasi-periodic oscillations in Cir X-1 (Tennant, A.F.), 230, 403
